- 60 gallon

Portable Toilet Frequently Asked Questions

What is included in the cost of the rental?

Portable toilet rentals include: delivery in our serviceable area, pick up and disposal of waste. Each unit is fully stocked. If rented for longer than 1 week, 1 cleaning and restocking is included each week for the duration of the rental.

Will my portable toilet be clean?

Absolutely without a doubt, we pride ourselves in providing the cleanest freshest portable toilets around. We use the strongest deodorizers and pleasant smelling scent disk to provide a pleasant experience. Newer units are used for weekend rentals and special events and as they age we move them to job sites.

How far ahead of time do I need to book a portable toilet rental?

Usually a few days' notice is sufficient but often we can accommodate last minute orders. If you are renting portable toilets for a special occasion or event we suggest that you book ASAP as it's first come first served

How do I know how many toilets I will need for my event or job site?

Please call our so we can assess your needs and process your order according to your needs based on people, hours, cleanings, etc...

Do portable toilet rentals require an electrical hook up or water?

Our regular portable toilet units do not require an electrical or water hook up, however our large trailers for your special event or construction need an electrical connection.

Where do you dispose of the waste?

We are fully licensed and insured waste hauler, we are an environmentally conscious company. Our technicians evacuate out the portable toilet units and then dispose of it at a licensed waste treatment facility that is certified by the Ministry of the Environment.

What If I need the unit for a day or two longer than a month?

Our billing cycle is a full month not 28 days. After the first month's rental we prorate your bill so you would only pay for what you use.
